

IAMTrusted Industry Partner Program

The IAMTrusted Industry Partner (ITIP) Program is built on the same foundation of trust as the IAM's Validation Program in IAMX. Over two-thirds of IAM's membership have voluntarily submitted to a Validation process that requires back-up documentation for each of their claimed industry qualifications. These verified documents proving their membership, compliance and quality qualifications are available for review at any time by their industry peers. The result is the formation of a select group of IAMX-Validated service providers and suppliers that are trusted worldwide.

This commitment to trust, professional service and ethical business practices is the basis for the IAMTrusted Industry Partner Program. Powered by the IAM Issue Resolution System, the ITIP Program is your assurance that issues and disputes among IAM Members will be resolved in a fair, timely and efficient manner.
